SQL Basics Tutorial with Khan Academy

Contents

Time required: 90 minutes

- Follow all directions carefully and accurately.

- Think of the directions as minimum requirements.

SQL Basics

Khan Academy has many, many free online classes. We are going to go through some SQL tutorials. The SQL tutorials are based on SQLite.

1. Go the following website. https://www.khanacademy.org

2. Create an account with Khan Academy. (It's free!)

3. Go through the following tutorial – Unit 3 Intro to SQL: Lesson 1: SQL Basics
   https://www.khanacademy.org/computing/computer-programming/sql

NOTE: You do not have to do the **Project Design a store database**.

4. Attach the sql code for the challenges. Save the files with an .sql extension.

   a. Book list database

   b. Box office hits database

   c. TODO list database stats

5. Attach a screenshot showing the successful completion of each challenge in the Khan Academy SQL workspace.

6. Attach a screenshot showing the successful completion of all the lessons as shown below

---

Assignment Submission

1. Attach the program files.

2. Attach screenshots showing the successful operation of the program.

3. Submit in Blackboard.
